

Division Basics

(Addition, Subtraction, Multiplication)

Student's Name : _____

class : _____

Now, we will do some Subtractions.

Subtraction means taking off the number from the given number.

Ex : $7 - 3 = 4$

Answers

$14 - 2 = \underline{12}$

$11 - 6 = \underline{5}$

$23 - 9 = \underline{14}$

$6 - 3 = \underline{3}$

$20 - 9 = \underline{11}$

$17 - 8 = \underline{9}$

$10 - 2 = \underline{10}$

$8 - 3 = \underline{5}$

$6 - 5 = \underline{1}$

$12 - 5 = \underline{7}$

$17 - 4 = \underline{13}$

$18 - 10 = \underline{8}$

$7 - 6 = \underline{1}$

$15 - 8 = \underline{7}$

$11 - 1 = \underline{10}$

$6 - 2 = \underline{4}$

$7 - 7 = \underline{0}$

$17 - 6 = \underline{11}$

$9 - 5 = \underline{4}$

$8 - 0 = \underline{8}$

$14 - 5 = \underline{9}$

$12 - 1 = \underline{11}$

$12 - 7 = \underline{5}$

$19 - 7 = \underline{12}$

$13 - 6 = \underline{7}$

$19 - 5 = \underline{14}$

$14 - 10 = \underline{4}$

$14 - 3 = \underline{11}$

$9 - 6 = \underline{3}$

$8 - 7 = \underline{1}$

$16 - 5 = \underline{11}$

$16 - 4 = \underline{12}$

$18 - 2 = \underline{6}$

$12 - 6 = \underline{6}$

$17 - 9 = \underline{8}$

$13 - 11 = \underline{2}$

$14 - 8 = \underline{6}$

$15 - 9 = \underline{6}$

$19 - 9 = \underline{10}$

$17 - 3 = \underline{14}$

$16 - 8 = \underline{8}$

$15 - 5 = \underline{10}$

$6 - 6 = \underline{0}$

$15 - 6 = \underline{9}$

$18 - 4 = \underline{14}$
