

Division Basics

(Half of a number(dividing by 2))

Student's Name : _____

class : _____

Half of a number means dividing the number into **exactly half**. That means dividing the number by 2 is the half of a number.

Answers

For example,

$$\frac{1}{2} \text{ of } 6 = \underline{\quad}$$

to find the answer, we need to think what two alike numbers if added together makes 6 ?

$$3 + 3 = 6$$

so, the answer will be 3. Means, same number adding twice to get the number 6.

Note: $\frac{1}{2} + \frac{1}{2}$ makes a whole.

Now, do some practice:

1. $32 \div 2 = \underline{16}$

9. $70 \div 2 = \underline{35}$

2. $50 \div 2 = \underline{25}$

10. $160 \div 2 = \underline{80}$

3. $\frac{1}{2}$ of 30 = $\underline{15}$

11. $\frac{1}{2}$ of 90 = $\underline{45}$

4. $36 \div 2 = \underline{18}$

12. $54 \div 2 = \underline{27}$

5. $\frac{1}{2}$ of 68 = $\underline{34}$

13. $\frac{1}{2}$ of 160 = $\underline{80}$

6. $100 \div 2 = \underline{50}$

14. $88 \div 2 = \underline{44}$

7. $\frac{1}{2}$ of 44 = $\underline{22}$

15. $\frac{1}{2}$ of 24 = $\underline{12}$

8. $98 \div 2 = \underline{49}$

16. $128 \div 2 = \underline{64}$
