## Understanding Data

Mr. Jon wants to buy more books for the library, but he has to prove to the principal it is absolutely necessary. He asked 40 students how many minutes they spend on leisure reading (reading for fun) every day. His results in the chart below.

| Leisure reading minutes per day |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 30 | 100 | 90 | 60 | 25 | 50 | 90 | 35 |  |  |
| 125 | 55 | 150 | 45 | 110 | 60 | 30 | 65 |  |  |
| 45 | 0 | 95 | 65 | 10 | 75 | 100 | 10 |  |  |
| 25 | 50 | 70 | 100 | 120 | 130 | 110 | 30 |  |  |
| 75 | 115 | 35 | 55 | 35 | 95 | 50 | 140 |  |  |

This Chart is helpful but hard to read. You need to organize the data to help show the information and better understand what it means. Especially if you are showing the results to someone else.

| Minutes Leisure Reading |  |  |
| :---: | :---: | :---: |
| Minutes | Tally | Frequency |
| 0-30 | HIT III | 8 |
| 31-60 |  |  |
| 61-90 |  |  |
| 91-120 |  |  |
| 121-150 |  |  |
|  |  | 40 Student |

A Frequency table is a great way to count the result and helps organize information. In a frequency table, you use tally marks to show how frequent an event happens. finish the table to organize data.

A histogram is a graph that helps you better see information and understand what it all means. finish the graph to understand the data.

## Should Mr. Jon get the money? Why or why not? <br> Explain your answer using the table and graph.
