

EQUIVALENT RATIOS(Multiplication And Division)

WRITE THE MISSING NUMERATOR OR DENOMINATOR

EXAMPLE

$$1. \frac{24}{12} = \frac{2}{1} = \frac{8}{4} = \frac{40}{20}$$

$$2. \frac{2}{9} = \frac{16}{72} = \frac{4}{18} = \frac{32}{144}$$

$$3. \frac{88}{44} = \frac{8}{4} = \frac{96}{48} = \frac{192}{96}$$

$$4. \frac{12}{8} = \frac{3}{2} = \frac{60}{40} = \frac{12}{8}$$

$$5. \frac{8}{12} = \frac{64}{108} = \frac{128}{216} = \frac{32}{49}$$

$$6. \frac{48}{72} = \frac{8}{12} = \frac{96}{144} = \frac{16}{24}$$

$$7. \frac{12}{18} = \frac{300}{450} = \frac{100}{150} = \frac{4}{6}$$

$$8. \frac{10}{3} = \frac{200}{60} = \frac{20}{6} = \frac{40}{12}$$

$$9. \frac{4}{5} = \frac{160}{200} = \frac{40}{50} = \frac{20}{25}$$

$$10. \frac{18}{14} = \frac{216}{168} = \frac{9}{7} = \frac{72}{56}$$

$$11. \frac{16}{30} = \frac{8}{15} = \frac{256}{480} = \frac{32}{60}$$

$$12. \frac{5}{14} = \frac{10}{28} = \frac{40}{112} = \frac{20}{56}$$

$$13. \frac{36}{12} = \frac{3}{1} = \frac{9}{3} = \frac{18}{6}$$

$$14. \frac{99}{33} = \frac{33}{11} = \frac{66}{22} = \frac{132}{44}$$

$$15. \frac{40}{32} = \frac{10}{8} = \frac{5}{4} = \frac{25}{20}$$
